Original map was produced for JHI 2002 and with updates by Stirling Surveys over the years including in November 2022.

<u>Terrain</u> - Errochty Forest is a cracking bit of terrain for Orienteering. West of the Allt Garth it comprises of natural woodland and mostly pine forest with squiggly contours and in places a plethora of rock features some of which make the underfoot conditions tough going. A large area has been felled in the past few years but this has been mainly avoided.

To the east the area is more standard forestry plantation where the runnability is different but still pleasant, particularly the downhill slaloms.

Note that some parts of the forest are likely to be waterlogged - southwest of the main felled area an indistinct marsh screen has been used to show the wettest of these areas (indicative extent only).

<u>Control Sites & Electronic Punching</u> - Standard equipment in the form of fibre glass stakes with Si Unit and IOF Control Flag attached. Touch free punching will be enabled.

If the Si Unit fails to Flash/Beep please punch your map with clipper found on the stake.

Code Number is displayed on the SI Box only.

You must contact punch both the Start SI Box and Finish SI Box.

Drinks Station - There are no drink stations or water provided at the Finish or at Download.

There is no map collection as competitors are being trusted not to discuss or show their map to anyone who has still to run their course - Thank-you!

Anyone having to retire is also asked to report to download so that we know you are safely back.
